

Activity:

Personal Risk Assessment

This activity represents an evaluation of the personal risks you are currently facing in your life. By listing your risks and answering questions about how serious they are and how best to manage them, you can potentially develop a risk management plan that aligns with your personal financial goals.

Activity: Personal Risk Assessment

Conduct an assessment of your current personal risk situation. For each of the following sections, list a risk you face now and then answer the questions to gauge its impact and how best to manage the risk.

List a risk you face in your life:

How often does this type of risk occur?

Rate the seriousness of the consequences:

1	2	3	4	5
Not Serious				Very Serious

What are you doing to reduce the risk?

Do you think you should make plans to reduce the risk more in the future?

Which risk management strategy would be best suited to mitigating this risk?
